

General Notes

- New 10mm glass post height is 24-1/8 in above the deck surface.
- Installation of posts and glass is exactly the same as previous systems.
- New top cap is a CenDek custom shape that incorporates a vinyl insert with easy to use line, corner and custom corner connections.

Recommended Top Cap Install

- Measure and fit top cap with out vinyl insert on glass or inside top cap.
- Mark and pre-drill any 90 degree corner screw holes (see sheet 2 for details).
- Remove top cap and place only vinyl insert along glass edge .
- Gently lay top cap on top of vinyl without pressing it fully down. This way you can slide the top cap back and forth to configure and screw one side of the Line and/or custom corner connector plates in position.
- When using a wall bracket, remember the wall bracket plate must attach to top cap first before fastened to a wall.
- Once top cap is in its final position press it firmly down onto the vinyl insert (should hear and feel a click) and continue to screw other side of connectors. It might be ok to fully fasten the connectors on both sides before pressing top cap onto vinyl insert.
- SEE SHEET 2 FOR DETAILS.
